## Promotion Announcement Functional Group=QG Version 004010 UCS

### Notes

1. It is the responsibility of the sender to ensure that the U.P.C. case code sent on the promotion has been clearly communicated to Super Store Industries before the promotion is transmitted. Invalid U.P.C.'s will cause a delay in processing the promotion.
2. Super Store Industries segment terminator is a tilde (~), the segment separator is an asterisk (\*), and the sub-element separator is a greater than symbol (>).
3. Any element marked "Not used" may be included, but will not be mapped or used by Super Store Industries.
4. For elements that are type R, include a decimal point for fractional quantities (e.g. 1½ would be sent as 1.5. For whole numbers, you can exclude the decimal
5. For elements that are type N, do not include a decimal point for fractional quantities. (e.g. If the definition were N2, 1½ would be sent as 150)
6. All quantities should be sent as positive numbers.
7. For the N1 loop, the N2, N3 and N4 segments are optional, but if you send the N3, you must also send the N4.
8. For the G46 segment, we will accept any value in G4601 that conforms to the standard. The values shown in this document are recommended values for specific charges/allowances that we expect to receive. Whether it reduces the amount of invoices is determined by what is sent in the G4602.
